PROFESSIONAL SUMMARY

Results-driven Senior Software Developer with **6 years** of experience designing, developing, and optimizing scalable enterprise web applications. Skilled in Full Stack Development using Vue.js, React.js, Node.js, PHP, and MySQL with expertise in frontend architecture, RESTful APIs, authentication systems, performance optimization, and CI/CD implementation. Experienced in Agile development, cross-functional collaboration, mentoring junior developers, and delivering high-quality scalable solutions for enterprise applications.

TECHNICAL SKILLS

- **Frontend:** Vue.js, Vuex, React.js, JavaScript, HTML5, CSS3, Bootstrap, jQuery
- **Backend:** Node.js, PHP, RESTful APIs
- **Database:** MySQL
- **Cloud & DevOps:** AWS, Amazon S3, Jenkins, GitHub Actions, CI/CD Pipelines
- **Tools & Platforms:** Git, Postman, Redmine, Figma
- **Concepts:** Agile Methodology, Authentication & Session Management, State Management, Performance Optimization, API Integration, Application Security, Cross-Application Integration, Performance Optimization, Technical Mentoring

EXPERIENCE

Senior Software Developer

Prodapt Solutions Pvt. Ltd

May 2025 - May 2026

Chennai, Tamilnadu

- Contributed to enterprise application development across **Vue.js**, **React.js**, **Node.js**, and backend services.
- Implemented seamless authentication and login integration across multiple applications, improving user experience and enabling secure cross-application access.
- Developed **AI-driven features** to improve automation, application efficiency, and user experience.
- **Optimized** large-scale **Vue.js** and React.js applications through component refactoring, performance tuning, lazy loading, state management improvements, and bundle optimization, significantly improving application responsiveness and load times.
- Led Node.js upgrade initiatives across multiple applications, ensuring compatibility, dependency migration, security improvements, and smooth production deployments, while designing and developing scalable RESTful APIs for frontend and backend integrations across enterprise systems.
- Led Agile activities including Sprint Planning, Sprint Reviews, CAB discussions, release coordination, technical and Confluence documentation, while collaborating with QA, DevOps, Product Owners, and Architects to deliver scalable solutions. Reviewed and mentored Software Engineers (SE) and Associate Software Engineers (ASE), ensuring adherence to coding standards, performance optimization, maintainability, best practices, and continuous improvement in code quality and team productivity.

Level-2 Software Developer

Linways Technologies Pvt. Ltd

Nov 2021 - Mar 2025

Kochi, Kerala

- Reviewed code for junior developers, providing guidance to ensure adherence to coding standards, proper functionality, and UI responsiveness. Maintained and enforced the organization's UI style guide, promoting consistency and best practices across projects.
- **Migrated** the frontend to **Vue.js**, enhancing UI/UX, improving performance, and reducing manual errors through a dynamic and reactive architecture. **Optimized** component reusability, state management, and lazy loading to boost efficiency, reduce load times, and ensure seamless user interactions

- Integrated **third-party APIs** and **payment gateways** into the Academic ERP system, enhancing functionality and seamless transactions. Additionally, implemented **Amazon S3** storage to efficiently handle and store large volumes of data, ensuring scalability and reliability.
- **Optimized complex MySQL queries** to enhance database performance, reducing query execution time and improving overall system efficiency. Strengthened security by implementing measures to **prevent SQL injection**, ensuring data integrity and robust system protection.
- Established coding standards and a style guide to enhance code consistency, maintainability, and overall organizational efficiency.
- Implemented and managed CI/CD pipelines using Jenkins and GitHub Actions to automate software deployment, ensuring efficiency, reliability, and faster release cycles.
- Led and facilitated collaboration across cross-functional teams, ensuring seamless communication, knowledge sharing, and professional excellence for successful project execution.

Level-1 Software Developer

Jul 2020 - Nov 2021

Linways Technologies Pvt. Ltd

Kochi, Kerala

- Led the development and management of the Exam and Academics Modules in an Academic ERP system, ensuring optimal functionality, performance, and user experience.
- Optimized critical web applications, improving performance by **70 %** through code refactoring and automating manual tasks, resulting in increased efficiency and faster load time.
- Actively participated in **Agile development** methodologies, including daily stand-ups, sprint planning, and retrospectives. Resolved software defects efficiently using **Redmine** within Agile workflows, ensuring timely project delivery and enhancing stakeholder satisfaction.
- Developed **unit tests** and performed extensive debugging to ensure high-quality, bug-free releases in each development cycle, enhancing software reliability and stability.
- Collaborated closely with senior developers to adhere to coding standards, enhance code quality, and foster effective communication for seamless knowledge sharing and teamwork.
- Integrated SMS functionality using a queue mechanism in PHP to optimize message delivery and reduce processing delays. Additionally, designed and implemented a dedicated queue within my module to efficiently manage long data transmissions and SMS processing, ensuring improved scalability, reliability, and system performance.

EDUCATION

Bachelor of Computer Science and Engineering, Kerala Technological University (KTU)

2017-2020

CGPA : 8.34

Diploma of Computer Hardware & Maintenance, Technical Education

2013 - 2016

CGPA : 8.31

PROJECTS

Academic Management System: Developed and managed an academic project for efficient course creation, exam management, and controller functionalities. Implemented a scalable and modular architecture, ensuring seamless integration and optimal system performance. Additionally, enhanced user experience by optimizing workflows and automating key academic processes.

Digital Valuation System Designed and implemented a digital valuation system utilizing AWS server infrastructure to automate assessment and grading processes, reducing manual effort and errors. Integrated secure data storage and processing to ensure accuracy and scalability. Enhanced system efficiency by optimizing performance, reliability, and real-time data processing for seamless evaluations.

AWARDS

- **University Rank Holder** – Recognized as a top-performing student and awarded the University Rank for academic excellence.
