OBJECTIVE

Results-driven Vue.js Developer and Level 2 Software Developer with 4.8 years of experience in building high-performance web applications. Proficient in Vue.js, PHP, MySQL, and RESTful API development, with expertise in scalable architectures, CI/CD pipelines, and agile development.

Skilled in team leadership, software optimization, cross-functional collaboration, and troubleshooting complex systems to ensure seamless functionality and efficiency. Passionate about innovation, automation, continuous learning, and delivering secure, efficient, and user-friendly software solutions that drive business success.

EXPERIENCE

Level-2 Software Developer

Nov 2021 – Mar 2025

Linways Technologies Pvt. Ltd

Kochi, Kerala

- Reviewed code for junior developers, providing structured guidance that improved adherence to coding standards by 30%, enhancing maintainability and reducing errors.
- Migrated the frontend to **Vue.js**, enhancing UI/UX performance by 40%, reducing manual errors by 35%, and boosting page load speed by 50% through a dynamic and reactive architecture. Optimized component reusability, state management, and lazy loading, reducing load times by 40% and ensuring seamless user interactions.
- Integrated third-party APIs and payment gateways into the Academic ERP system, increasing transaction efficiency and reducing payment failures by 25%. Additionally, implemented **Amazon S3** storage, ensuring efficient handling of large data volumes with improved scalability and reliability.
- **Optimized** complex **MySQL** queries, reducing query execution time by 60% and improving overall system efficiency. Strengthened security by implementing SQL injection prevention measures, ensuring data integrity and robust system protection.
- Established coding standards and a style guide, improving code consistency and reducing technical debt by 35%.
- Developed and automated **CI/CD** pipelines using Jenkins and GitHub Actions, reducing deployment time by 70% and ensuring faster, more reliable software releases.
- Led and facilitated collaboration across cross-functional teams, ensuring streamlined workflows that resulted in a 20% reduction in project completion time.
- Deployed token-based authentication to enhance system security and user access management, reducing unauthorized access incidents by 40% and improving session management efficiency.

Level-1 Software Developer

Jul 2020 – Nov 2021

Linways Technologies Pvt. Ltd

Kochi, Kerala

- Led the development and management of the Exam & Academics Modules in an Academic ERP system, enhancing system efficiency by 30%.
- Optimized critical web applications, improving performance by 70% through code refactoring and automation of manual tasks, resulting in increased efficiency and faster load times.
- Contributed to **Agile development** workflows, resolving software defects efficiently using **Redmine**, reducing bug resolution time by 40%.
- Created unit tests and conducted thorough debugging, ensuring 99% bug-free releases and improving overall software stability.
- Collaborated closely with senior developers, improving code quality and maintainability by 30% through structured reviews, adherence to coding standards, and knowledge sharing.
- Developed and optimized **SMS** functionality using PHP, reducing message processing delays by 40% and enhancing delivery reliability by implementing a **queue** mechanism.

- Optimized coding, testing, and implementation of C programs for embedded projects, reducing development time by 20% and increasing system efficiency by 15%.
- Built a Wi-Fi-based Room Controller System, integrating an embedded module with an Android application, leading to a 20% improvement in automation efficiency and enabling seamless remote control.
- Assembled and validated a functional prototype, working alongside PCB teams, ensuring 100% compatibility across hardware and software components for efficient mass production.
- Maintained strong teamwork and clear communication with senior engineers and cross-functional teams, ensuring a 25% reduction in project turnaround time through effective collaboration and knowledge sharing.

SKILLS

- **Frontend** : Vue.js, Vuex, JavaScript, HTML, CSS, Bootstrap, JQuery
- **Databases** : MySQL
- **Backend** : PHP, RESTful APIs
- **DevOps** : AWS, Apache, CI/CD (Jenkins, GitHub Actions)
- **Version Control & Tools** : Git, GitHub, Redmine, Postman, Figma
- **Security & Authentication** : Token-based authentication(JWT), SQL injection prevention
- **Testing & Debugging** : Unit Testing ,Debugging tools (Xdebug)
- **Agile Development & Team Collaboration** : Agile & Scrum methodologies, Code reviews

EDUCATION

Bachelor of Computer Science and Engineering, APJ Abdul Kalam Technological University 2017 - 2020
CGPA : 8.34

Diploma of Computer Hardware & Maintenance, Technical Education 2013 - 2016
CGPA : 8.31

PROJECTS

Academic Management System: Orchestrated and managed an academic project for efficient course creation, exam management, and controller functionalities. Designed a scalable and modular architecture using Vue.js, PHP, MySQL, and RESTful APIs, ensuring seamless integration and optimal system performance. Additionally, enhanced user experience by optimizing workflows and automating key academic processes, reducing manual intervention by 40%.

Digital Valuation System: Spearheaded the development of a digital valuation system utilizing AWS server infrastructure to automate assessment and grading processes, reducing manual effort and errors. Executed CI/CD pipelines using Jenkins and GitHub Actions, ensuring smooth deployments and minimizing downtime. Incorporated secure data storage and real-time processing to enhance performance, reliability, and scalability, improving evaluation efficiency by 30%.

AWARDS

- **University Rank Holder** – Recognized as a top-performing student and awarded the University Rank for academic excellence.
