PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer** with nearly **6 years** of experience building and maintaining scalable enterprise web applications using PHP, Vue.js, React.js, Node.js, MySQL, JavaScript, and RESTful APIs. Experienced in full-stack development, API integration, authentication and authorization, CI/CD pipelines, AWS deployments, performance optimization, and Agile software delivery. Strong understanding of MVC architecture, scalable application design, clean coding practices, code reviews, and technical mentoring.

TECHNICAL SKILLS

- **Frontend:** Vue.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
- **Backend:** PHP, Node.js, RESTful APIs, MVC Architecture
- **Database:** MySQL, Database Design, Query Optimization
- **Cloud & DevOps:** Docker, AWS (S3), Jenkins, GitHub Actions, CI/CD, Linux, Apache
- **Tools & Platforms:** Git, GitHub, GitLab, Postman, Figma, Redmine, Jira
- **Concepts:** Agile Methodology, Authentication & Session Management, State Management, API Integration, Application Security, Cross-Application Integration, Performance Optimization, Technical Mentoring

EXPERIENCE

Senior Software Developer

May 2025 - May 2026

Prodapt Solutions Pvt. Ltd | Chennai, Tamil Nadu

- Developed and maintained enterprise full-stack applications using **PHP, Vue.js, React.js, and Node.js**.
- Built and integrated **RESTful APIs** for secure communication between multiple enterprise applications.
- Developed **AI-driven features** to improve automation, application efficiency, and user experience.
- Implemented **authentication and authorization** workflows using session-based security and JWT integration.
- Improved frontend performance through lazy loading, component optimization, and efficient state management, enhancing application responsiveness and overall user experience.
- Led Node.js upgrades, dependency migrations, RESTful API development, CI/CD releases, and production deployments across multiple applications. Coordinated Agile delivery and release activities with QA, DevOps, Product Owners, and Architects; conducted code reviews and mentored SE/ASE engineers to ensure coding standards, performance, and maintainability.

Level-2 Software Developer

Nov 2021 - Mar 2025

Linways Technologies Pvt. Ltd | Kochi, Kerala

- Designed and developed scalable Academic ERP modules using **PHP, Vue.js, JavaScript, MySQL, and MVC architecture**, contributing to both frontend and backend development across enterprise applications.
- Led the migration and modernization of frontend applications to Vue.js, enhancing UI/UX, performance, responsiveness, and user experience through dynamic and reactive architecture. Improved component reusability, state management, lazy loading, and frontend performance to reduce load times and ensure seamless interactions.
- Designed, developed, and consumed **RESTful APIs** for academic workflows and integrated third-party services including **Payment Gateway**, **SMS Gateway**, and **AWS S3** for secure transactions, notifications, and scalable data storage.

- **Optimized** complex MySQL queries and backend business logic through query tuning and code refactoring, reducing execution time and improving overall application performance. Implemented secure authentication, input validation, session management, and SQL injection prevention to ensure data integrity and application security.
- Established and enforced coding standards, UI style guidelines, and development best practices across projects. Conducted **code reviews for junior developers**, providing technical guidance on code quality, functionality, maintainability, performance, and responsive UI implementation.
- Implemented and managed **CI/CD pipelines** using Jenkins and GitHub Actions, automating build, testing, and deployment processes to improve release efficiency, reliability, and delivery cycles.
- Collaborated closely with QA, DevOps, Product Owners, Architects, and other cross-functional teams in Agile environments, facilitating knowledge sharing, technical discussions, release coordination, and successful delivery of scalable and maintainable solutions.

Level-1 Software Developer

Jul 2020 - Nov 2021

Linways Technologies Pvt. Ltd | Kochi, Kerala

- Developed Exam and Academics modules using **Vue.js, PHP, MySQL, JavaScript, HTML5, CSS3, and MVC architecture**, delivering responsive and user-friendly features for the Academic ERP.
- Built reusable Vue.js components and integrated frontend interfaces with RESTful APIs, implementing academic workflows and business requirements while developing hands-on expertise in full-stack application development.
- Developed PHP backend modules and implemented queue-based SMS processing and background operations to efficiently handle long-running tasks and large data transmissions.
- Optimized Vue.js application code, database schemas, and complex SQL queries through refactoring and automation, improving overall application performance by approximately 70%, reducing load times, and minimizing manual effort.
- Performed debugging, production issue resolution, and unit testing to identify defects, improve application stability, and ensure reliable, high-quality releases throughout development cycles.
- Participated in **Agile** practices including daily stand-ups, sprint planning, and retrospectives, collaborating with senior developers and QA teams to deliver features within sprint timelines.
- Followed coding standards and development best practices while collaborating with senior developers, contributing to code quality, knowledge sharing, and continuous improvement of Vue.js and full-stack development practices.

EDUCATION

Bachelor of Computer Science and Engineering | Kerala Technological University | **2017–2020** | **CGPA: 8.34**

Diploma of Computer Hardware | Board of Technical Education, Kerala | **2013–2016** | **CGPA: 8.31**

PROJECTS

Academic Management System: Developed and managed a scalable academic management application using PHP, Vue.js, MySQL, JavaScript, and RESTful APIs for efficient course creation, exam management, and controller functionalities. Implemented modular architecture, optimized workflows, and automated key academic processes to improve system performance and user experience.

Digital Valuation System: Designed and implemented a digital valuation system using AWS infrastructure to automate assessment and grading processes, reducing manual effort and minimizing errors. Integrated secure data storage and processing to ensure accuracy, scalability, and reliability. Enhanced system performance through optimized workflows and real-time data processing, enabling efficient and seamless evaluation.

AWARDS

- **University Rank Holder** – Recognized as a top-performing student and awarded the University Rank for academic excellence.
